Impact of New Type Pneumonia in China (6th report)

We announce the measures of our group factory in response to the outbreak of new type pneumonia in China as follows.

1. Wuhan Factory

We were preparing for the start of operation on February 14 due to the restriction of the business activity until 24:00 on February 13. However, since the movement of people is still restricted by various regulations, we are working to collect information including the availability of operation. We plan to resume operation of the factory as soon as confirmation of various regulations release is obtained.

2. Future prospects

We will inform you if the situation changes in the future. In addition, we will promptly inform you if the effects of this measure on business results are found.
